

Yard Debris...as You Walk!

It's an **efficient shredder**, too, with 4 replaceable blades that quickly and thoroughly reduce yard waste up to one-eighth its original volume by grinding it against a unique 360° discharge screen. Processed material is automatically collected in the removable 3.5 bushel bag. With this **convenient collection system**, you can reuse the chips and mulch produced by the TROY-BILT Chipper/Vac to improve your garden and give your property a professionally landscaped look!

The TROY-BILT Chipper/Vac is incredibly easy to use. The front of the machine is a **powerful vacuum**. You simply walk behind the machine, gathering up yard debris...automatically!

Self-propelled wheels (5HP Model) power the machine up and down slopes and over uneven terrain with ease. The Peerless® transaxle, designed exclusively for this machine, features four forward speeds plus park and power reverse so you can match the machine's speed to the volume of debris: slow for vacuuming thick stands of leaves and twigs...faster for light clean-up and quick maintenance around drives and walkways.

Covered by TROY-BILT
3-Year Limited Warranty
Please ask your Dealer for details.

The staggered front wheels allow you to get up close to fences, walls and other obstacles to your right. The handlebars bend upward and adjust three ways for maximum comfort. Plus there's a folding position for compact storage.

Like all TROY-BILT products, the TROY-BILT Chipper/Vac is designed to give you years of high performance and satisfaction. We start with a dependable Tecumseh engine featuring solid-state ignition for fast starts...enclose it with 13-gauge steel housing... and finish it with baked-on powder paint that lasts up to five times longer than conventional liquid paint finishes.

Which TROY-BILT® Chipper/Vac is Right for You?

4HP Model for smaller suburban yards with flat lawns

This is the economical choice for smaller yards (1/4 - 1/2 acre) without a lot of ruts and hills. Simply start the engine and go! The Leaf Tray is standard with this Model.

5HP Self-Propelled Model for larger properties

With its self-propelled wheels, the 5HP Model is much easier to maneuver up and down hills. Four forward speeds plus reverse let you match the machine to the job at hand. The Vacuum Snout is standard.
